

# **Children's Services: Information and Education**

## **Holiday Weekends / Camps**

The Tayside Paediatric Diabetes Team run annual activity camps alternating between the 5-12 year olds and the 12-18 year olds. The staff, the children and their families benefit greatly from the weekend camps, the children realise that they are not alone with their diabetes, the staff have a unique opportunity to get to know the children outside the hospital setting and the families gain confidence in allowing their child to go away for the weekend.

The cost of these camps is fully met by the Paediatric Diabetes Education Fund which relies on donations. If you would like to donate please ask your diabetes specialist nurse.
